

Westside Christian School Guidance

2008 – 2009 Technology Fees \$95.00

Dear Warrior Parents:

We have started an innovative new program to help the students of our school. It is called the Learning Center. We are hopeful that this program will help many of the students who fall behind in their education through illness, absences, learning disabilities or unfortunate situations. The beauty of the Learning Center is that it will also assist students that are excelling in their classes. It will make it possible for them to work ahead and take advanced programs.

We would like to start this program as soon as possible. We want a center for the lower grades as well as for high school. To start the program we need computers. We are so confident that our center will help students that would otherwise be struggling. It will also protect their self esteem, as everyone advanced and remedial will pass through the learning center.

Technology is a large part of our world and a large part of Westside's curriculum. The technology fee will make it possible for us to keep up with the advances and have the very best of equipment for your child's education. As you know, our tuition is very low. With this fee, we can make sure that our curriculum can match that of a much larger and much more expensive (tuition wise) program.

We envision new computers in the lab, computers in every classroom, smart boards and many other advantages to your student. It will also give us the funds to have a professional tech team (contracted) to make sure that our equipment is always in good repair.

This will be a once a year fee, much like a book fee. Thank you for joining us in wanting the very best we can offer to your student.
